August 21-23, 2018, Jeju, Korea

Post publication by SCI/SCIE journal (High Impact Factor – Top ranked 25%: Q1, Web of Science).

==Overview ==

In Human-centric Computing and Information Sciences (HCIS), KIPS-CSWRG plans to publish high quality papers which cover the various theories and practical applications related to human-centric computing and information sciences. In HCIS 2018 workshop, the published papers are expected to present results of significant value to solve the various problems with application services and other problems which are within the scope of HCIS. In addition, we expect they will trigger further related research and technological improvements relevant to our future lives.

These are the hot topics that will satisfy the ever-changing needs of a world-wide audience. In approximately 5 to 10 years the editors plan to include new emerging topics to HCIS 2018 scope,

in order to make the workshop reflect future generations' IT related human-centric computing and information sciences.

==Topics==

HCIS 2018 stands for the continuously evolving and converging information technologies, including:
